

OMNIS Compliance Evidence Report

Bench: provided sample Generated: 2026-04-15

Executive summary

Omniscience Index: 64.4/100

Automation Rate: 48.6%

Requirements: 9 Evidence records: 500 Unmapped: 0

Status breakdown: {'GAP': 3, 'PARTIAL': 3, 'UNKNOWN': 3}

Requirements

POL-ENC-001-R1 [GAP]

Policy: Data Encryption and Protection Confidence: 0.54

Linked evidence: 25 record(s) Stale: 20/25 (window 30d)

Requirement POL-ENC-001-R1 (Data Encryption and Protection) requires: All data at rest must be encrypted using AES-256 or stronger. The linked evidence affirmatively fails to demonstrate the control. 20 of 25 record(s) are rejected, stale without approval, or contradicted. Evidence age ranges from 5 to 178 days. 20 of 25 record(s) fall outside the 30-day Monthly freshness window. Mean evidence confidence is 0.77; status confidence is 0.54. Recommended next step: Remediate the failing control and re-collect current, approved evidence.

Next step: Remediate the failing control and re-collect current, approved evidence.

POL-ENC-001-R2 [PARTIAL]

Policy: Data Encryption and Protection Confidence: 0.41

Linked evidence: 15 record(s) Stale: 7/15 (window 90d)

Requirement POL-ENC-001-R2 (Data Encryption and Protection) requires: Encryption keys must be rotated at least annually. The evidence conflicts. 2 record(s) support the control while 9 contradict it (rejected, stale, or low confidence), and 4 are inconclusive. An auditor cannot rely on conflicting evidence without reconciliation. Evidence age ranges from 18 to 166 days. 7 of 15 record(s) fall outside the 90-day Quarterly freshness window. Mean evidence confidence is 0.74; status confidence is 0.41. Recommended next step: Reconcile the conflicting records and retire the stale or rejected evidence.

Next step: Reconcile the conflicting records and retire the stale or rejected evidence.

POL-ENC-001-R3 [UNKNOWN]

Policy: Data Encryption and Protection Confidence: 0.00

Linked evidence: 0 record(s) Stale: 0/0 (window 1d)

Requirement POL-ENC-001-R3 (Data Encryption and Protection) requires: Data in transit must use TLS 1.2 or higher. No evidence is currently linked to this requirement. This is a coverage gap: the control cannot be demonstrated and must be treated as unproven until evidence is collected. Recommended next step: Collect and link evidence for this requirement from Network Configuration, SSL Certificate Inventory.

Next step: Collect and link evidence for this requirement from Network Configuration, SSL Certificate Inventory.

POL-AC-001-R1 [UNKNOWN]

Policy: Access Control and Identity Management Confidence: 0.00

Linked evidence: 0 record(s) Stale: 0/0 (window 1d)

Requirement POL-AC-001-R1 (Access Control and Identity Management) requires: Administrative access requires multi-factor authentication. No evidence is currently linked to this requirement. This is a coverage gap: the control cannot be demonstrated and must be treated as unproven until evidence is collected. Recommended next step: Collect and link evidence for this requirement from Azure AD Configuration, Login Logs.

Next step: Collect and link evidence for this requirement from Azure AD Configuration, Login Logs.

POL-AC-001-R2 [GAP]

Policy: Access Control and Identity Management Confidence: 0.65

Linked evidence: 14 record(s) Stale: 8/14 (window 90d)

Requirement POL-AC-001-R2 (Access Control and Identity Management) requires: Access must follow principle of least privilege. The linked evidence affirmatively fails to demonstrate the control. 9 of 14 record(s) are rejected, stale without approval, or contradicted. Evidence age ranges from 10 to 166 days. 8 of 14 record(s) fall outside the 90-day Quarterly freshness window. Mean evidence confidence is 0.76; status confidence is 0.65. Recommended next step: Remediate the failing control and re-collect current, approved evidence.

Next step: Remediate the failing control and re-collect current, approved evidence.

POL-AC-001-R3 [UNKNOWN]

Policy: Access Control and Identity Management Confidence: 0.00

Linked evidence: 0 record(s) Stale: 0/0 (window 30d)

Requirement POL-AC-001-R3 (Access Control and Identity Management) requires: Privileged accounts must have no personal use. No evidence is currently linked to this requirement. This is a coverage gap: the control cannot be demonstrated and must be treated as unproven until evidence is collected. Recommended next step: Collect and link evidence for this requirement from Activity Logs, Browser History (if applicable).

Next step: Collect and link evidence for this requirement from Activity Logs, Browser History (if applicable).

POL-AUD-001-R1 [PARTIAL]

Policy: Audit Logging and Monitoring Confidence: 0.02

Linked evidence: 79 record(s) Stale: 77/79 (window 1d)

Requirement POL-AUD-001-R1 (Audit Logging and Monitoring) requires: All access to sensitive data must be logged. The evidence conflicts. 1 record(s) support the control while 63 contradict it (rejected, stale, or low confidence), and 15 are inconclusive. An auditor cannot rely on conflicting evidence without reconciliation. Evidence age ranges from 0 to 179 days. 77 of 79 record(s) fall outside the 1-day Daily freshness window. Mean evidence confidence is 0.76; status confidence is 0.02. Recommended next step: Reconcile the conflicting records and retire the stale or rejected evidence.

Next step: Reconcile the conflicting records and retire the stale or rejected evidence.

POL-AUD-001-R2 [GAP]

Policy: Audit Logging and Monitoring Confidence: 0.65

Linked evidence: 13 record(s) Stale: 11/13 (window 30d)

Requirement POL-AUD-001-R2 (Audit Logging and Monitoring) requires: Logs must be retained for minimum 90 days. The linked evidence affirmatively fails to demonstrate the control. 12 of 13 record(s) are rejected, stale without approval, or contradicted. Evidence age ranges from 18 to 177 days. 11 of 13 record(s) fall outside the 30-day Monthly freshness window. Mean evidence confidence is 0.76; status confidence is 0.65. Recommended next step: Remediate the failing control and re-collect current, approved evidence.

Next step: Remediate the failing control and re-collect current, approved evidence.

POL-AUD-001-R3 [PARTIAL]

Policy: Audit Logging and Monitoring Confidence: 0.04

Linked evidence: 354 record(s) Stale: 342/354 (window 7d)

Requirement POL-AUD-001-R3 (Audit Logging and Monitoring) requires: Log access must be restricted and monitored. The evidence conflicts. 4 record(s) support the control while 275 contradict it (rejected, stale, or low confidence), and 75 are inconclusive. An auditor cannot rely on conflicting evidence without reconciliation. Evidence age ranges from 0 to 179 days. 342 of 354 record(s) fall outside the 7-day Weekly freshness window. Mean evidence confidence is 0.74; status confidence is 0.04. Recommended next step: Reconcile the conflicting records and retire the stale or rejected evidence.

Next step: Reconcile the conflicting records and retire the stale or rejected evidence.

Appendix: corpus integrity findings

[HIGH] duplicate_description (count 500)

500 of 500 rows share one requirement_description (1 distinct values total): 'Data access must be logged and reviewed'. Evidence cannot be told apart by description alone.

[HIGH] orphan_requirement_refs (count 500)

500 rows reference 381 requirement_ids absent from the 9 parsed requirements. Sample: REQ100, REQ106, REQ107, REQ108, REQ110, REQ111, REQ114, REQ116, REQ117, REQ119.

[MEDIUM] impossible_review_dates (count 239)

239 rows have review_date earlier than collection_date (evidence reviewed before it was collected).

[MEDIUM] status_confidence_contradiction (count 18)

18 rows are marked Approved but carry confidence_score < 0.6. Status and confidence disagree.

[LOW] freshness_field_consistency (count 455)

455 rows have a freshness_days value that disagrees with (reference_date 2026-04-15 - collection_date) by more than 7 days. The stored freshness cannot be trusted; OMNIS recomputes freshness from dates.
