

OMNIS Compliance Evidence Report

the partly omniscient auditor

synthetic bench . 15 requirements . generated 2026-04-15

Abstract

OMNIS parsed 15 requirements from the synthetic policy set and linked 500 evidence records against them. The Omniscience Index, a weighted composite of evidence coverage, freshness, and confidence, is 92.6 out of 100, with an automation rate of 64.4%. 0 evidence records were left unmapped. The sections below give the per-requirement compliance status with its supporting evidence and freshness, followed by the data-quality findings OMNIS raised against the corpus itself.

1 Executive summary

Metric	Value
Omniscience Index	92.6 / 100
Automation Rate	64.4%
Requirements	15
Evidence records	500
Unmapped evidence	0
Status breakdown	12 partial, 3 gap

Figure 1. Compliance status across 15 requirements (12 partial, 3 gap).

2 Requirements

2.1 POL-ENC-001-R1 **PARTIAL**

Data Encryption and Protection. Confidence 0.33. 29 evidence records. Stale 19/29 (window 30 days).

Requirement POL-ENC-001-R1 (Data Encryption and Protection) requires: All data at rest must be encrypted using AES-256 or stronger. The evidence conflicts. 9 record(s) support the control while 6 contradict it (rejected, stale, or low confidence), and 14 are inconclusive. An auditor cannot rely on conflicting evidence without reconciliation. Evidence age ranges from 3 to 163 days. 19 of 29 record(s) fall outside the 30-day Monthly freshness window. Mean evidence confidence is 0.73; status confidence is 0.33. Recommended next step: Reconcile the conflicting records and retire the stale or rejected evidence.

Next step. Reconcile the conflicting records and retire the stale or rejected evidence.

2.2 POL-ENC-001-R2 **PARTIAL**

Data Encryption and Protection. Confidence 0.51. 31 evidence records. Stale 4/31 (window 90 days).

Requirement POL-ENC-001-R2 (Data Encryption and Protection) requires: Encryption keys must be rotated at least annually. The evidence conflicts. 17 record(s) support the control while 7 contradict it (rejected, stale, or low confidence), and 7 are inconclusive. An auditor cannot rely on conflicting evidence without reconciliation. Evidence age ranges from 1 to 144 days. 4 of 31 record(s) fall outside

the 90-day Quarterly freshness window. Mean evidence confidence is 0.73; status confidence is 0.51. Recommended next step: Reconcile the conflicting records and retire the stale or rejected evidence.

Next step. Reconcile the conflicting records and retire the stale or rejected evidence.

2.3 POL-ENC-001-R3 **GAP**

Data Encryption and Protection. Confidence 0.00. 27 evidence records. Stale 27/27 (window 1 days).

Requirement POL-ENC-001-R3 (Data Encryption and Protection) requires: Data in transit must use TLS 1.2 or higher. The linked evidence affirmatively fails to demonstrate the control. 10 of 27 record(s) are rejected, stale without approval, or contradicted. Evidence age ranges from 9 to 159 days. 27 of 27 record(s) fall outside the 1-day Continuous freshness window. Mean evidence confidence is 0.74; status confidence is 0.00. Recommended next step: Remediate the failing control and re-collect current, approved evidence.

Next step. Remediate the failing control and re-collect current, approved evidence.

2.4 POL-AC-001-R1 **PARTIAL**

Access Control and Identity Management. Confidence 0.03. 27 evidence records. Stale 26/27 (window 1 days).

Requirement POL-AC-001-R1 (Access Control and Identity Management) requires: Administrative access requires multi-factor authentication. The evidence conflicts. 1 record(s) support the control while 6 contradict it (rejected, stale, or low confidence), and 20 are inconclusive. An auditor cannot rely on conflicting evidence without reconciliation. Evidence age ranges from 1 to 167 days. 26 of 27 record(s) fall outside the 1-day Daily freshness window. Mean evidence confidence is 0.79; status confidence is 0.03. Recommended next step: Reconcile the conflicting records and retire the stale or rejected evidence.

Next step. Reconcile the conflicting records and retire the stale or rejected evidence.

2.5 POL-AC-001-R2 **PARTIAL**

Access Control and Identity Management. Confidence 0.51. 61 evidence records. Stale 8/61 (window 90 days).

Requirement POL-AC-001-R2 (Access Control and Identity Management) requires: Access must follow principle of least privilege. The evidence conflicts. 34 record(s) support the control while 19 contradict it (rejected, stale, or low confidence), and 8 are inconclusive. An auditor cannot rely on conflicting evidence without reconciliation. Evidence age ranges from 6 to 173 days. 8 of 61 record(s) fall outside the 90-day Quarterly freshness window. Mean evidence confidence is 0.77; status confidence is 0.51. Recommended next step: Reconcile the conflicting records and retire the stale or rejected evidence.

Next step. Reconcile the conflicting records and retire the stale or rejected evidence.

2.6 POL-AC-001-R3 **PARTIAL**

Access Control and Identity Management. Confidence 0.24. 21 evidence records. Stale 17/21 (window 30 days).

Requirement POL-AC-001-R3 (Access Control and Identity Management) requires: Privileged accounts must have no personal use. The evidence conflicts. 3 record(s) support the control while 9 contradict it (rejected, stale, or low confidence), and 9 are inconclusive. An auditor cannot rely on conflicting evidence without reconciliation. Evidence age ranges from 4 to 173 days. 17 of 21 record(s) fall outside the 30-day Monthly freshness window. Mean evidence confidence is 0.75; status confidence is 0.24. Recommended next step: Reconcile the conflicting records and retire the stale or rejected evidence.

Next step. Reconcile the conflicting records and retire the stale or rejected evidence.

2.7 POL-AUD-001-R1 **GAP**

Audit Logging and Monitoring. Confidence 0.03. 40 evidence records. Stale 40/40 (window 1 days).

Requirement POL-AUD-001-R1 (Audit Logging and Monitoring) requires: All access to sensitive data must be logged. The linked evidence affirmatively fails to demonstrate the control. 21 of 40 record(s) are rejected, stale without approval, or contradicted. Evidence age ranges from 4 to 176 days. 40 of 40 record(s) fall outside the 1-day Daily freshness window. Mean evidence confidence is 0.77; status confidence is 0.03. Recommended next step: Remediate the failing control and re-collect current, approved evidence.

Next step. Remediate the failing control and re-collect current, approved evidence.

2.8 POL-AUD-001-R2 **PARTIAL**

Audit Logging and Monitoring. Confidence 0.27. 34 evidence records. Stale 28/34 (window 30 days).

Requirement POL-AUD-001-R2 (Audit Logging and Monitoring) requires: Logs must be retained for minimum 90 days. The evidence conflicts. 5 record(s) support the control while 7 contradict it (rejected, stale, or low confidence), and 22 are inconclusive. An auditor cannot rely on conflicting evidence without reconciliation. Evidence age ranges from 3 to 139 days. 28 of 34 record(s) fall outside the 30-day Monthly freshness window. Mean evidence confidence is 0.78; status confidence is 0.27. Recommended next step: Reconcile the conflicting records and retire the stale or rejected evidence.

Next step. Reconcile the conflicting records and retire the stale or rejected evidence.

2.9 POL-AUD-001-R3 **PARTIAL**

Audit Logging and Monitoring. Confidence 0.07. 41 evidence records. Stale 38/41 (window 7 days).

Requirement POL-AUD-001-R3 (Audit Logging and Monitoring) requires: Log access must be restricted and monitored. The evidence conflicts. 1 record(s) support the control while 17 contradict it (rejected, stale, or low confidence), and 23 are inconclusive. An auditor cannot rely on conflicting evidence without reconciliation. Evidence age ranges from 0 to 167 days. 38 of 41 record(s) fall outside the 7-day Weekly freshness window. Mean evidence confidence is 0.76; status confidence is 0.07. Recommended next step: Reconcile the conflicting records and retire the stale or rejected evidence.

Next step. Reconcile the conflicting records and retire the stale or rejected evidence.

2.10 POL-SOX-001-R1 **PARTIAL**

Financial Reporting Controls. Confidence 0.29. 38 evidence records. Stale 26/38 (window 30 days).

Requirement POL-SOX-001-R1 (Financial Reporting Controls) requires: Changes to financial reporting systems must follow documented change management with segregation of duties. The evidence conflicts. 7 record(s) support the control while 17 contradict it (rejected, stale, or low confidence), and 14 are inconclusive. An auditor cannot rely on conflicting evidence without reconciliation. Evidence age ranges from 2 to 170 days. 26 of 38 record(s) fall outside the 30-day Monthly freshness window. Mean evidence confidence is 0.77; status confidence is 0.29. Recommended next step: Reconcile the conflicting records and retire the stale or rejected evidence.

Next step. Reconcile the conflicting records and retire the stale or rejected evidence.

2.11 POL-SOX-001-R2 **PARTIAL**

Financial Reporting Controls. Confidence 0.47. 27 evidence records. Stale 3/27 (window 90 days).

Requirement POL-SOX-001-R2 (Financial Reporting Controls) requires: Access to financial data must be reviewed and certified each quarter. The evidence conflicts. 10 record(s) support the control while 9 contradict it (rejected, stale, or low confidence), and 8 are inconclusive. An auditor cannot rely on conflicting evidence without reconciliation. Evidence age ranges from 4 to 167 days. 3 of 27 record(s) fall outside the 90-day Quarterly freshness window. Mean evidence confidence is 0.73; status

confidence is 0.47. Recommended next step: Reconcile the conflicting records and retire the stale or rejected evidence.

Next step. Reconcile the conflicting records and retire the stale or rejected evidence.

2.12 POL-HIPAA-001-R1 **PARTIAL**

Protected Health Information Safeguards. Confidence 0.28. 37 evidence records. Stale 26/37 (window 30 days).

Requirement POL-HIPAA-001-R1 (Protected Health Information Safeguards) requires: Protected health information must be encrypted at rest and in transit. The evidence conflicts. 6 record(s) support the control while 12 contradict it (rejected, stale, or low confidence), and 19 are inconclusive. An auditor cannot rely on conflicting evidence without reconciliation. Evidence age ranges from 0 to 171 days. 26 of 37 record(s) fall outside the 30-day Monthly freshness window. Mean evidence confidence is 0.76; status confidence is 0.28. Recommended next step: Reconcile the conflicting records and retire the stale or rejected evidence.

Next step. Reconcile the conflicting records and retire the stale or rejected evidence.

2.13 POL-HIPAA-001-R2 **GAP**

Protected Health Information Safeguards. Confidence 0.02. 27 evidence records. Stale 26/27 (window 1 days).

Requirement POL-HIPAA-001-R2 (Protected Health Information Safeguards) requires: Access to protected health information must be logged with audit controls. The linked evidence affirmatively fails to demonstrate the control. 17 of 27 record(s) are rejected, stale without approval, or contradicted. Evidence age ranges from 1 to 177 days. 26 of 27 record(s) fall outside the 1-day Daily freshness window. Mean evidence confidence is 0.76; status confidence is 0.02. Recommended next step: Remediate the failing control and re-collect current, approved evidence.

Next step. Remediate the failing control and re-collect current, approved evidence.

2.14 POL-PCI-001-R1 **PARTIAL**

Cardholder Data Protection. Confidence 0.53. 36 evidence records. Stale 5/36 (window 90 days).

Requirement POL-PCI-001-R1 (Cardholder Data Protection) requires: Cardholder data must be stored only when necessary and rendered unreadable wherever it is kept. The evidence conflicts. 18 record(s) support the control while 11 contradict it (rejected, stale, or low confidence), and 7 are inconclusive. An auditor cannot rely on conflicting evidence without reconciliation. Evidence age ranges from 5 to 157 days. 5 of 36 record(s) fall outside the 90-day Quarterly freshness window. Mean evidence confidence is 0.79; status confidence is 0.53. Recommended next step: Reconcile the conflicting records and retire the stale or rejected evidence.

Next step. Reconcile the conflicting records and retire the stale or rejected evidence.

2.15 POL-PCI-001-R2 **PARTIAL**

Cardholder Data Protection. Confidence 0.12. 24 evidence records. Stale 21/24 (window 7 days).

Requirement POL-PCI-001-R2 (Cardholder Data Protection) requires: Network access to the cardholder data environment must be restricted by firewall rules. The evidence conflicts. 2 record(s) support the control while 10 contradict it (rejected, stale, or low confidence), and 12 are inconclusive. An auditor cannot rely on conflicting evidence without reconciliation. Evidence age ranges from 2 to 173 days. 21 of 24 record(s) fall outside the 7-day Weekly freshness window. Mean evidence confidence is 0.78; status confidence is 0.12. Recommended next step: Reconcile the conflicting records and retire the stale or rejected evidence.

Next step. Reconcile the conflicting records and retire the stale or rejected evidence.

3 Corpus integrity findings

Data-quality issues OMNIS detected in the evidence corpus and reported, rather than crashed on. Severity reflects audit impact.

3.1 duplicate_description **HIGH**

500 rows. 500 of 500 rows share one requirement_description (1 distinct values total): 'Synthetic control requirement'. Evidence cannot be told apart by description alone.

3.2 orphan_requirement_refs **HIGH**

52 rows. 52 rows reference 52 requirement_ids absent from the 15 parsed requirements. Sample: ORPHAN-REQ-1184, ORPHAN-REQ-1193, ORPHAN-REQ-1865, ORPHAN-REQ-2106, ORPHAN-REQ-2199, ORPHAN-REQ-2455, ORPHAN-REQ-2525, ORPHAN-REQ-2552, ORPHAN-REQ-2798, ORPHAN-REQ-2992.

3.3 status_confidence_contradiction **MEDIUM**

28 rows. 28 rows are marked Approved but carry confidence_score < 0.6. Status and confidence disagree.
